Brothers Against Decisions
Awesome Sexy Spectacular Epic Squad

Pivots We've Had to Make

The Netflix-roulette API exists and has documentation online, it was bought by the video archive ReelGood and privatized. No one outside of ReelGood has access to this API.

Future Plans

Using the same idea of removing the weighty task of decision-making from our users, we will create an app that tells you where to eat, based on Yelp's public API

Running - Where We Are Already

React-Native dev environment
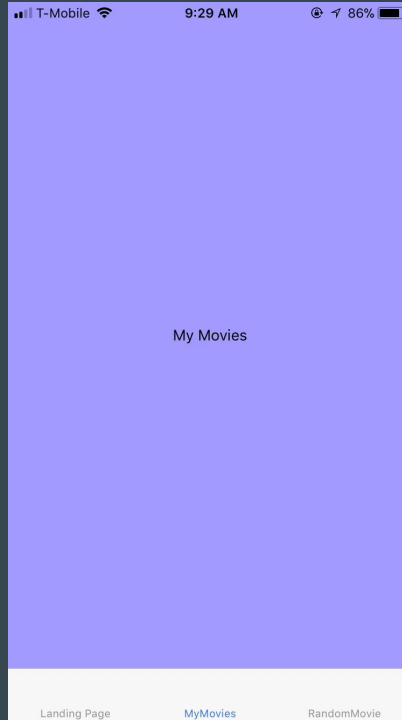

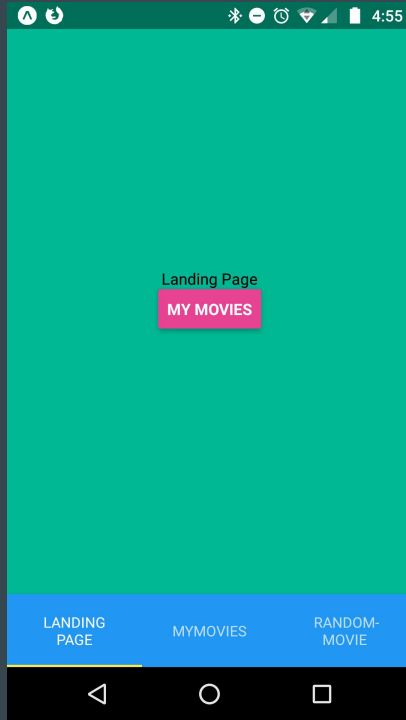

Simple app with navigation

API

Yelp Fusion

- Free API, 25k requests daily
- Search and Business Lookup (documentation)
- We will add our own randomization function

App Demo

Goals For April 11

- REST call familiarity
- Randomization algorithm
- Color scheme + Wireframes
- Measurable progress
- Dogfood the app, look for early adopters
- Look into comparing with Google Maps reviews
